

Primary Plus and Secondary Plus

Online courses

Our team of English experts and network of 2,500 teachers love finding new ways to inspire young learners. They designed our online courses to provide the same progress as regular face-to-face courses, adopting a slightly different approach which is tailored to virtual learning.

Our new approach

We know that working on a screen can be more challenging and intense than in a classroom. To ensure students get the most out of their online learning we use a new combination of:

- **live online classes** with their teacher and classmates
- **interactive guided learning** before the live class.

How it works

Before each live class, students will have a guided interactive learning activity set by their teacher so that they come prepared to the live lesson. We call this **the ‘flipped classroom’ approach**. It means that the online class time can be more focused on deepening their English language skills through activities and discussions with classmates.

What are the benefits?

This methodology allows for live classes where face-to-face screen time is used for an immersive and productive lesson – without being too long or too tiring. This way **we can keep students’ attention throughout the whole lesson, allowing them more time to speak, participate, and build confidence.**

We also reduced class sizes to up to 10 students in a group, which means:

- **more teacher time per student**
- **more personalised attention.**

The curriculum hasn’t changed! Primary Plus Online and Secondary Plus Online continue to be modular English courses, designed by experts, delivered with high quality materials in a way optimised for learning online.

We provide a safe, supportive and relaxed online space, where everyone feels welcome.
